The next generation system remote control preserves the same sleek, compact design while adding single key press device selection and context sensitive programmable buttons. Providing customization and control programming never before possible in a handheld device, this combination of flexibility and power creates a new remote that further simplifies the homeowners experience, liberating them from their cluttered and confusing collection of remote.

Featuring bi-directional communication, a backlit LCD screen and ZigBee (802.15.4) wireless connectivity the System Remote Control Version 2 puts information and control of the whole home right in the palm of the homeowner's hand.

It is all part of the Control4 vision. We bring the benefits of a truly automate home to more people with solutions at are affordable, easy to install and designed to adapt to any home or lifestyle.

## Features and Benefits

### Intuitive and Elegant Design

• **Compact form factor** — No other remote offers so much control in such a small package.
• **Ergonomic design** — Designed to match a hand's natural curves, making it easy to hold and use.
• **Easy to use** — Backlit LCD screen designed for easy readability.

### Handheld Intelligence

• **Quick access control** — Single button press to turn on you're a/v gear and start watching or listening to your favorite source.
• **Bi-directional communication** — Two-way communication with the Control4 home automation system gives users status information as well as control of any connected device.
• **Anywhere control** — Wireless connectivity enables control of any intelligent device from anywhere in the house; no more pointing the remote at the TV.
• **Anything control** — Control an entire home automation system with this compact device.
• **Plug and play ease** — Immediately works with the Control4 home automation system.

### Affordable For Every Customer

• **Surprisingly inexpensive** — Get complete home automation control at an affordable price.
• **Cost-effective functionality** — Matches typical home control touch screens and keypads in functionality — at a fraction of the cost.
• **Single source of control** — When integrated with the Control4 system, it can replace every other remote control in the house.

*Turn down the lights in the den while channel surfing in the home theater. See what's playing on the family room stereo while cooking dinner in the kitchen — then change the tunes with the push of a button. Check the house temperature from the bedroom — then bring it down a few degrees before heading out with the kids.*
